I am proud member of the Buffalo-Niagara Building Trades and I am writing to support the proposed Route 33/Kensington Expressway Project. This nearly \$1 billion project would create hundreds of union construction jobs, reduce environmental pollution, and reconnect a neighborhood severed by the original Route 33 Project. The tunnel would create green space for the community while maintaining the current flow of traffic. The addition of Complete Street roadway design would mean improvements for pedestrians and cyclists. I am asking that this project be approved as soon as possible.

I am proud member of the Buffalo-Niagara Building Trades and I am writing to support the proposed Route 33/Kensington Expressway Project. This nearly \$1 billion project would create hundreds of union construction jobs, reduce environmental pollution, and reconnect a neighborhood severed by the original Route 33 Project. The tunnel would create green space for the community while maintaining the current flow of traffic. The addition of Complete Street roadway design would mean improvements for pedestrians and cyclists. I am asking that this project be approved as soon as possible.

COMMENTS*

At first glance, capping the expressway and landscaping it seemed a good idea. But after careful consideration of what that entails, I am not for this build going forward. I do not have confidence the quality of life regarding noise and pollution will significantly improve. My preference is to remove (or fill in) the expressway particular the part running in middle of the residential areas, and not dig further down to accommodate the cap. Would like to see, and I know it's possible, a similar project like was done to fill in the Rochester Inner Loop East and make it street level.

I am proud member of the Buffalo-Niagara Building Trades and I am writing to support the proposed Route 33/Kensington Expressway Project. This nearly \$1 billion project would create hundreds of union construction jobs, reduce environmental pollution, and reconnect a neighborhood severed by the original Route 33 Project. The tunnel would create green space for the community while maintaining the current flow of traffic. The addition of Complete Street roadway design would mean improvements for pedestrians and cyclists. I am asking that this project be approved as soon as possible.
